

CORNING

Technical Community Visiting Scholar and Student Welcome

Critical Information Regarding Safety and Information Security

Welcome to Corning Incorporated. We are pleased to have you visiting with us and appreciate the technical and interpersonal contributions that you will make to our community. In order to protect both you and Corning and to ensure that you get the most out of your visit with us, please read the following critical information. If you have any questions regarding the information contained in this document please discuss with your site sponsor. After reviewing the information please sign and return to your site sponsor.

Safety

- You are responsible for ensuring that you do all of your work in a safe manner. Please inspect all tools used to perform your work and ensure that they are in good operating condition. Consult with a site safety representative if you feel that you need additional tools or equipment in order to operate safely.
- You and your site sponsor are responsible for ensuring that you are able to safely perform your responsibilities. Please consult with your site sponsor on your first day to develop a safety training plan and timeline. All required safety training must be complete.
- Do not go into a lab until you have consulted with the lab owner and ensure that you have received the proper safety training required before entering the lab.
- Do not work with chemicals unless you have received the proper training and education and have reviewed the SDS for that chemical. Proper Personal Protective Equipment (PPE) must be worn.
- Corning strives to have a safe and healthy work environment. If you are involved in a safety incident or encounter a potentially unsafe situation report it to your site sponsor or site safety representative immediately.
- Please ensure that you are aware of evacuation and emergency procedures for any Corning locations that you will be visiting.

Passwords

- Ensure that you use a very strong computer password that contains upper and lowercase letters, numbers and symbols.
- Always lock your computer when you are away from your computer.

E-mail Usage

- Corning e-mail is intended for business purposes only.

- Do not use your Corning e-mail on a non-Corning device.
- Sending Corning Restricted information to non-authorized systems such as personal or school e-mail accounts is prohibited.
- For the protection of Corning IP, Corning e-mail traffic is monitored

Social Media

- Please limit company related posts. IP or restricted information is never to be shared externally. When using the Blue Line internally consider whether it is appropriate to share the information broadly. Presentations or documents containing any Corning Incorporated proprietary information are not to be shared on group document sharing sites such as Prezi.
- Do not describe projects, technical information, or customer names.
- Many of our customers have agreements in place that prevent Corning from legally disclosing their name.
- For the protection of our IP, Corning does monitor and follow-up regarding social media posts.
- Please read and review Corning's Social Media Policy.

Imaging

- It is not permitted to take pictures of any kind while on Corning property without an approved imaging pass. Once approved, a camera must be used to capture the images as opposed to mobile device (at Sullivan Park). If capturing images at another location consult with local security for rules.
- Sullivan Park Image Pass Request
- For all other locations find the imaging pass application on the Global Security web site; policies and related documents page.
- The use of mobile phones to take pictures is strictly prohibited; this includes "selfies" and "event photos" within a Corning facility.

Information Sharing

- Corning information should be shared ONLY with internal Corning employees or approved contractors and only on a need to know basis.
- Corning business should not be discussed outside of Corning. Please use extreme caution when in public places such as restaurants, college common areas, or parks where people who are not authorized might be listening to conversations.
- Before e-mailing documents, consider carefully who is on the distribution list and whether they need to have the information.

- Texts, instant messaging, and other forms of communication should not be used to send Corning information outside of the Corning network.

Approval Process Required for External Publication or Presentation

- All publications or presentations containing Corning information or based on Corning information, including dissertations, thesis, and research reports or presentations, must be pre-approved prior to submission or presentation. Just mentioning in the paper that the work was done at Corning Incorporated or that it should be treated as confidential is not sufficient.
- If you plan to publish or present externally, please review the approval process in advance with you site sponsor. Please allow a minimum of 2-3 weeks for your content to be approved by our legal department.

Document Classification and Information Storage

- All documents prepared on the Corning system and/or regarding Corning business are required to be properly classified. Please visit our information security website for additional information on classification of documents.
- Store Corning files only in approved locations. Documents should not be stored on university or personal drives under any circumstances. If you are not sure how to properly store Corning documents, please consult with you site sponsor.
- Use secure methods to properly dispose of paper documents, electronic files, samples, and any other Corning restricted materials.
- Corning documents are not to be downloaded to USB's or other external storage sites without written approval from your Corning site supervisor.
- Corning samples or products are never to be stored offsite. If you have business reason to take product of any type off Corning property, please be sure to consult with your site sponsor and our IP department to ensure that you are doing so in a safe and secure manner.
- Never leave a computer containing Corning information unattended in a non Corning or insecure location.
- Clean desks, conference rooms, whiteboards, and printers after use. Never leave Corning documentation unattended.
- You will be asked to use your badge to print documents at Corning. Never walk away from the printer and leave your materials unattended. Must have a Corning e-mail to print.
